SUMMARY

IT undergraduate building things that work — not just submitting assignments. Currently contributing to a live CRPF-deployed system (SATHI) and building an AI agent framework from scratch under Intel Unnati. Background spans system automation, cybersecurity (90%+ in IR & forensics training), and frontend dev. Looking for roles where the work is real and the learning curve is steep.

PROJECTS & EXPERIENCE

AI Agent Framework | Python, DAG, REST, Apache 2025 – Present
Intel Unnati Industrial Training Program

- Built a custom AI agent framework from scratch with DAG-based orchestration, tool integration, memory handling, and observability — covering 5+ core agent subsystems without relying on CrewAI, AutoGen, or n8n.
- Designed modular pipeline (ingress → orchestrator → executors → state) reducing workflow coupling by structuring each layer independently with retry/timeout mechanisms.

SATHI | UI Validation, API Testing, Performance May 2025 – Mar 2026
CRPF

- Debugged 30+ UI screens and validated backend API endpoints, resolving broken states, edge-case flows, and integration gaps across the full application.
- Identified and fixed performance bottlenecks, improving key workflow response times and overall application responsiveness.

Smart File Manager | Python, Tkinter, Multithreading Jun 2023 – Jan 2024

- Automated file organization with time-based color tagging, duplicate detection, and multi-threaded operations — reducing manual file management effort by ~60% in testing.
- Published in IJAR SCT (Jan 2024) — research cited hands-on performance results across 1,000+ test files.

Web Developer Intern 2023
Anweb Technologies Pune, MH

- Developed and enhanced UI components for ShopAt (e-commerce app) using HTML, CSS, JavaScript — delivered 3+ feature modules across the internship.
- Improved frontend responsiveness and layout consistency, reducing UI-related issues by iterating through structured testing cycles.

CERTIFICATIONS & PUBLICATIONS

Detect & Defend — IR & Digital Forensics Blueprint — Secured Bharat Group Oct – Nov 2025
Cyber Security Tools & Techniques Workshop — Cyber Sanskar Sep 2023
Publication: Intelligent Automation in File Management — IJAR SCT, Jan 2024

TECHNICAL SKILLS

Languages | Python, Java, C, C++, JavaScript, SQL
Cybersecurity | Nmap, Wireshark, FTK Imager, Autopsy, VirusTotal, Incident Response, Digital Forensics
AI & Dev | DAG Workflows, Agent Framework Design, Git, Linux CLI, REST APIs

EDUCATION

B.E. Information Technology 2024 – 2027
Nutan Maharashtra Institute of Engineering and Technology, Talegaon
Diploma in Computer Engineering 2021 – 2024
Pimpri Chinchwad Polytechnic, Pune — 88.97%
SSC (Class X) 2020 – 2021
Pratibha International School (CBSE) — 86%
